CorelDRAW Applied

Set of 3 CD's
\$160.00
plus shipping and GST

Corel Applied is a set of Corel Draw Training CD's that have been produced specifically for the Trophy and Engraving Industry. It's a set of 3 CD's that teach you everything from the basics to cleaning up logos and editing photographs. There is no irrelevant info to waste your time or confuse you. Each lesson is set out using a Trophy or Plaque layout making it easier to learn. These discs are great value for both the complete beginner or the experienced Graphics person.

For someone that already knows how to use Corel Draw there is still a vast amount of time saving tips and macros that you'll pick up. It also makes a great training CD for staff and will help to make all staff consistently efficient with Corel Draw. If you're a complete beginner and never delved into graphics before then this is definitely for you. Its lessons are very simple to follow and you can do the exercises as you go. It is a great fast tracking way of getting your business into graphics which is today becoming a necessity more so than an option.

Whether you're starting out in Graphics or been doing it for years these CD's will advance your knowledge extensively

PB2034 860mm Wide Auto Recycling Pressure Pot System

Expand your capabilities with the best advice available for Sand Blasting

Phone: 02 9772 1999 Fax: 02 9792 2374
email:sales@problast.com.au

An exceptionally well built Delux Pressure Pot Sand Blasting system with completely sealed Auto-refill Pressure Pot. Completely seam welded so it will last forever and all fittings are top quality. This cabinet won't break down or let you down. Other features include comfortable arm rests and full gloves. It also has a dual door set up with an access door on either side. To make sure you get the best view, it comes with an over sized viewing window and 2 bright lights inside the cabinet to light up your job. The Blasting nozzle is our standard 3/32" carbide nozzle and all fittings are guaranteed to be of the best quality. Lastly the cabinet is made of heavy gauge steel and is finished off with powder coating. All this in one system and guess what?.....It comes on wheels so you can move it around real easily. It also has a really neat air flow over the viewing glass that keeps the inside of the glass clear and reduce wear. See our website for details.

It will engrave everything except for rubber.

Glass, Crystal, Acrylic, Timber,
all metals including Stainless Steel, Trafolyte, Engravers Ply
Get into Sand Blasting and Bast into the Crazy

16 bag system with manual shaker handles to make your dust extractor virtually maintenance free

The dust collector is built directly onto the rear of the unit to save space. This new design features sixteen internal dust collecting cloth bags which separate and capture dust particles, providing a much cleaner environment over competing models and no messy filter to clean out. New mechanical "shaker" feature and trapdoor design completely eliminates exposure to air-born dust during maintenance and dust removal. The quiet sounding Dust extractor is a clever easy access boxed system attached to the back of the cabinet with a progressive filter bag shaker to keep it working at it's best always. It's the quietest system on the market today and it's virtually maintenance free leaving you to get on with the job.

Add:
17cfm Compressor

Includes:
Regulator
2 way outlet
70ltr tank
Australian made

Virtually
MAINTENANCE
FREE

Just Shake and Forget

Add:
SK2- Start up PhotoMask Kit
Includes:
Letralite Exposure unit
Washout hose, Film and all consumables needed to get started.

"It's the most
efficiently designed
Cabinet in the world"
