## CorelDRAW Applied

Corel Applied is a set of Corel Draw Training CD's that have been produced specifically for the Trophy and Engraving Industry. It's a set of 3 CD's that teach you everything from the basics to cleaning up logos and editing photographs. There is no irrelevant info to waste your time or confuse you. Each lesson is set out using a Trophy or Plaque layout making it easier to learn. These discs are great value for both the complete beginner or the experienced Graphics person.

For someone that already knows how to use Corel Draw there is still a vast amount of time saving tips and macros that you'll pick up. It also makes a great training CD for staff and will help to make all staff consistently efficient with Corel Draw. If you're a complete beginner and never delved into graphics before then this is definitely for you. Its lessons are very simple to follow and you can do the exercises as you go. It is a great fast tracking way of getting your business into graphics which is today becoming a necessity more so than an option.

Whether you're starting out in Graphics or been doing it for years, these CD's will advance your knowledge extensively
